

Compliance with emissions monitoring - Practical experience from planning to operation FREE Technical Seminars

Over the coming months, ABB, The Durag Group and Environmental Compliance Ltd will be hosting three FREE seminars across the country.

The presentations, aimed at planners, developers, technical providers and operators of energy from waste (EfW) plants, large combustion plants and biomass plants, will be beneficial for operators regulated by the Environment Agency and those who use continuous emission monitoring systems (CEMS).

These seminars will provide an overview on the various stages of planning and permit application process, and a synopsis of proven CEMS equipment and the important role they play in ensuring regulatory compliance, specifically achieving conformity with BS EN 14181.

The seminar's will be held at the following venues; Murrayfield Stadium, Scotland – 23rd March, Riverside Stadium, Middlesbrough – 27th April and Bowood Golf Resort, Wiltshire – 8th June 2010

Murrayfield Stadium, Scotland - 23rd March

Riverside Stadium, Middlesbrough - 27th April

Bowood Golf Resort, Wiltshire - 8th June

Compliance with emissions monitoring - Practical experience from planning to operation FREE Technical Seminars

Company Profiles :

ABB Limited are a leader in power and automation technologies that enable utility and industry customers to improve performance while lowering environmental impact. For more than half a century, ABB has developed, manufactured, and supplied analyser products and systems to all sectors of the world's industry. ABB analysers are widely used in almost every industry sector. ABB in the UK operates from more than 20 locations nationally and employs 2,300 people.

Durag Group has been manufacturing emission monitoring products for over 40 years. Globally acknowledged for being a primary supplier of Particulate, Flow, true continuous Mercury monitoring and data acquisition/reporting equipment, Durag Group utilises a range of techniques and modern technologies to cover all EPR, PPC and EPA applications.

Environmental Compliance Ltd, based in South Wales, the Midlands and North of England provide specialist consultancy, measurement, monitoring and training services to clients operating in a broad range of industrial sectors. Specialist areas include UKAS/MCERTS emissions monitoring to the latest standards, including BS EN 14181, and all aspects of environmental consultancy, including environmental impact assessment, planning and EPR applications. These services, in conjunction with Environmental Management, Health & Safety and occupational hygiene monitoring services, ensure that Environmental Compliance Ltd are well placed to offer a turnkey package to operators for all their environmental and workplace obligations throughout the UK and Europe

Agenda :

- 9.30 Arrival & coffee
- 9.55 Introduction
- 10.00 Environmental Compliance - An overview of the planning and permitting regime for industrial processes
- 10.45 ABB - Continuous Emissions Monitoring Systems - critical design and operating criteria
- 11.30 Break
- 11.40 Durag Group - Dust, Flow and Mercury - considerations and Implementation
- 12.30 Lunch
- 13.15 Guest Speakers;
23rd March - Ian Conroy, Process Engineering Manager of SEPA
27th April – To be confirmed
8th June - Paul Wiggins, Technical Advisor of the Environment Agency
- 14.00 Environmental Compliance - From commissioning to compliance - a monitoring perspective
- 14.45 Break
- 15.00 ABB - Continuous Monitoring Techniques : in situ and Extractive
- 15.30 Durag Group - Data Acquisition and Reporting Package - the final link
- 16.10 Close
